We recommend:

Light is a fantastic source of effects and emotion during an event. We can create environments and decors in the colors that suit your meeting or event. If you want to make it really effective, you can change the color of the decors for different parts of the meeting. Perhaps the previously calm green color scheme in the room has changed to inspiring blue when the participants return after a nice lunch break. There is a lot we can accomplish to enhance the message and feel of your meeting with the help of various lighting effects.

Contact your sales / project manager for more information and a offer.
